

April 5, 2017
Ohio State Capitol
Columbus, Ohio

Richard Moore, Advocacy Chair

Committee: Lauren Manson, David Kissinger, Ryan Clark, Jeff Haas, Mark Harvey, Grainne Mangan, Scott Mash, Lux Phatak, Kim Stults, Joanne White, Heidi Lamb, John Paganini, Giuseppe Dilulio, Anthony Caponi, Simmons Paul, Valerie Rogers

HERE'S HOW YOU CAN HELP:

- **Continue to support policies and funding for systems to reduce infant mortality in Ohio.**
- **Support policies to increase HIE utilization to support coordination of care across the care continuum in Ohio consistent with national standards.**
- **Support the funding of health IT jobs and workforce development programs needed to implement the health IT objectives and regulatory changes in Ohio.**

Accountable Ohio

by Dr. Mark Redding

1. **Reduce Risk** - Make risk reduction our State goal and focus on risk reduction for individual and family well-being.
2. **Work as a Team** - The comprehensive reduction of risk is the most evidence-based strategy for improving infant mortality and all other health, social and economic outcomes. Remove the silos standing between agencies, research organizations, community initiatives, and policy development in a focused State effort to accountably identify and address risk within populations most at-risk.
3. **Require Evidence Based Coordination and Completion of Risk Reduction.** Use all available evidence-based and promising practice models of both care coordination and direct service intervention across health, social, and behavioral health services, to assure that risks are identified and effectively addressed. Use technology and centralized data collection, in cooperation with government and community-based research teams, to increase the efficiency and effectiveness of risk reduction while reducing cost.
4. **Cultural Competency and Relationships in Care Coordination** – Deploy and support individuals with the cultural connection, communication and relationship skills proven to achieve changes in behavior and improved outcomes for their fellow community members. Assure appropriate pay, benefits, training, supervision and a team-based approach for outreach, identification, and risk reduction for Ohio's most complex individuals and families. Empower community based care coordinators with evidence and infrastructure to address complicated health and social service needs.
5. **American Business Model** - In a nation that spends the most on healthcare and has some of the worst outcomes in the developed world. . . Set the example by using accountable work production, pay for performance and American business strategies. Carefully define the work products related to risk reduction in both care coordination and the delivery of direct intervention. Pay for performance strategies that extend across all domains - holding all parties accountable in a comprehensive approach to confirm reduction of risk. Use American business strategies to evaluate the cost, and where finances can be placed most effectively to achieve the work products that produce health. Achieve accountability of governmental institutions as well as community partners in reducing risk and improving the wellbeing of individuals and families we have been given the honor to serve.

**10th Annual
Ohio Healthcare Information Technology Day
April 5, 2017**

Time	Topic	Location	Presenter
9:00 AM	Welcome	Ohio Statehouse Atrium	Rick Moore
9:00 AM – 9:10 AM	Chapter's Welcome	Ohio Statehouse Atrium	Jeff Haas & Giuseppe Dilulio
9:10 AM – 9:15 AM	Appreciation for organizers/logistics	Ohio Statehouse Atrium	Rick Moore
9:15 AM – 9:30 AM	Advocacy Day Training Refresher	Ohio Statehouse Atrium	David Kissinger
9:30 AM – 10:00 AM	Pair up for legislative visits	Ohio Statehouse Atrium	Lauren Manson
10:00 AM – 12:00 PM	Legislative visits as scheduled	Riffe Center/Senate Building	Networking
12:00 PM – 2:00 PM	Luncheon Keynote Speakers	Ohio Statehouse Atrium	Rick Moore
12:00 PM – 12:10 PM	HIMSS Legislator of the year	Ohio Statehouse Atrium	Rick Moore
12:10 PM – 12:30 PM	Sen Charleta Tavares D-15 Ohio S.B. 332 Commission on Infant Mortality Recommendations	Ohio Statehouse Atrium

2:00 PM – 4:00 PM	Legislative visits as scheduled	Riffe Center/Senate Building	Networking
3:00 PM – 4:00 PM	OHIT Day Panel Ohio S.B. 332 Commission on Infant Mortality Recommendations	Ohio Statehouse Atrium	Ryan Clark
	Dr. Mark Redding, Pathways Community HUB, Mansfield, Ohio		
	Sandy Oxley, Bureau Chief, ODH Maternal, Child and Family Health Bureau		
	Dr. Mary Applegate, Medical Director, Ohio Department of Medicaid		
	Tanikka Price, Moms2B, OSU Wexner Center, Nationwide Children's Hospital		
	Reina M. Sims, MSA, Program Manager, Ohio Commission on Minority Health		
	Diane Cummins, COO, Five Rivers Health Centers		
	Dan Paoletti, CEO, Ohio Health Information Partnership		
4:00 PM – 5:00 PM	Reception	Ohio Statehouse Atrium	Rick Moore
4:00 PM – 4:15 PM	Drawings and Giveaways		Jeff Haas

Note: The Riffe Center is attached to the Statehouse via an underground tunnel if the weather is bad.

Ohio SB 332, the Commission on Infant Mortality Recommendations & Healthcare IT is the theme of the 10th Annual Ohio Healthcare Information Technology Day #OHIT2017.

Columbus, OH - The 10th annual Ohio Healthcare Information Technology Day (OHIT Day) will occur on Wednesday, April 5, 2017 at the Ohio Statehouse. Governor John Kasich has proclaimed that day Ohio Healthcare Information Technology Day throughout the State of Ohio.

The focus of this year's OHIT day will be Ohio's effort to reduce the state's infant mortality rate. Ohio ranks 45th in the nation in overall infant mortality rate with a rate of 7.33 infant deaths per 1,000 live births. Are there ways that Healthcare IT can help bring this rate down?

The event is a collaborative effort between the Central and Southern Ohio chapter of the Healthcare Information and Management Systems Society (CSOHIMSS), the Northern Ohio HIMSS chapter (NOHIMSS), the Ohio Healthcare Information and Management Association (OHIMA), the HIMSS Innovation Center, and eHealth Ohio, with a goal of bringing Healthcare Information Technology (HIT) to the forefront of the political discussion.

Attendees will meet in the Ohio Statehouse Atrium throughout the day for educational sessions, with opportunities to meet with state officials and lawmakers in their legislative offices.

In addition to the opportunity to visit with State legislators, a full educational program will occur throughout the day.

Highlights of the day will include addresses by the Honorable Senator Charleta Tavares D-15, Co-Sponsor of Ohio SB 332; Director Barbara Sears Director of the Ohio Department of Medicaid; Mark Redding, Co-Founder of the Pathways Community HUB; Sandy Oxley, Bureau Chief, Ohio Department of Health Maternal, Child and Family Health Bureau; Jason Buckner, VP of Operations for HealthBridge HIE; and Dan Paoletti, CEO of Ohio Health Information Partnership and the ClinicSync HIE. A panel discussion with Mr. Redding, Ms. Oxley, Dr. Mary Applegate, Medical Director of Ohio Department of Medicaid and other thought leaders will take place in the afternoon.

Richard Moore, Advocacy Chair of CSOHIMSS, said, "This is our 10th year of bringing our message to policymakers at the Ohio State Capitol of transforming healthcare for Ohioans through healthcare Information Technology (HIT). Each year we shine a light on important HIT issues and help policymakers learn more about the healthcare industry. This year our focus is on the Infant Mortality crisis in Ohio and how the State government is acting to solve this crisis using HIT; technology that can help reduce risk factors, provide measurable progress toward outcomes and pay for performance. OHIT Day will celebrate the beginning of the SB 332 journey as the bill officially goes into effect on 4/6/2017."

CSOHIMSS supports careers in healthcare information systems in Ohio. CSOHIMSS has representation from the provider, consultant and vendor healthcare industry segments and works to enhance communication and education among its over 1,100 local chapter members.

Additional information on CSOHIMSS website at <http://www.csohimss.org> and via social media, on Twitter at <http://twitter.com/CSOHIMSS> and <http://www.facebook.com/Csohimss>. Follow OHIT Day [#OHIT2017](https://twitter.com/CSOHIMSS). CSOHIMSS Media Contact: Mark Harvey, Public Relations, 740-591-2190

This event is funded through the generous donations provided by the following sponsors: OHIMA, CHIME, eHealth Ohio, CliniSync, Health Collaborative/HealthBridge, CoverMyMeds, Cisco, CA Technologies, Hyland OnBase, NetSmart and Red Hat.

ABOUT HIMSS

Healthcare Information and Management Systems Society (HIMSS) is a cause-based, not-for-profit organization exclusively focused on providing global leadership for the optimal use of information technology (IT) and management systems for the betterment of healthcare. Founded 50 years ago, HIMSS and its related organizations are headquartered in Chicago with additional offices in the United States, Europe and Asia. HIMSS represents more than 52,000 individual members, of which more than two thirds work in healthcare provider, governmental and not-for-profit organizations. HIMSS also includes over 650 corporate members and more than 250 not-for-profit organizations that share our mission of transforming healthcare through the effective use of information technology and management systems. HIMSS frames and leads healthcare practices and public policy through its content expertise, professional development, research initiatives, and media vehicles designed to promote information and management systems' contributions to improving the quality, safety, access, and cost effectiveness of patient care. To learn more about HIMSS and to find out how to join us and our members in advancing our cause, please visit our website at www.himss.org.

ABOUT OHIMA

The Ohio Health Information Management Association (OHIMA) is Ohio's professional health care organization of over 3000 credentialed specialists in the field of health information management (HIM). OHIMA is a non-profit, component state association affiliated with the 63,000-member American Health Information Management Association (AHIMA).

ABOUT CHiME

The College of Healthcare Information Management Executives (CHIME) is an executive organization dedicated to serving chief information officers and other senior healthcare IT leaders. With more than 1,450 CIO members and over 95 healthcare IT vendors and professional services firms, CHIME provides a highly interactive, trusted environment enabling senior professional and industry leaders to collaborate; exchange best practices; address professional development needs; and advocate the effective use of information management to improve the health and healthcare in the communities they serve. For more information, please visit www.cio-chime.org.

Luncheon Speakers

Senator Charleta B. Tavares - Ohio Senate District 15

Charleta B. Tavares (D-Columbus) was re-elected and sworn in on January 5, 2015 as the State Senator for the 15th District and Assistant Democratic Leader in the Ohio Senate. A committed public servant, she has served since 2011 as the State Senator, which includes, Bexley and parts of Grandview Heights as well as the historic neighborhoods of the city of Columbus. She currently serves as the Senate ranking member on both the Ways and Means and the Health and Human Services Committees. In addition, she also serves as a member of the Finance, Finance Subcommittee on Corrections, Joint Medicaid Oversight Committee, Joint Committee on Agency Rules and Review, and serves as Co-Chair of the Ohio Constitutional Modernization Commission.

Tavares previously served as member of Columbus City Council from 1999-2010. Prior to joining Council, Tavares left a legacy for the citizens of Ohio during her 5 ½-year tenure in the Ohio General Assembly as the State Representative in the 22nd House District. Tavares is the first African-American and Democrat female to serve in the state legislature from Franklin County, Ohio (House and Senate) and the first African-American woman ever to hold a leadership position in the history of the Ohio General Assembly.

Tavares was recently selected to serve as the President/CEO of Primary One Health. A federally qualified primary healthcare system to provide access to services that improve the health status of families including people experiencing financial, social, or cultural barriers to health care.

Tavares recently served as Executive Director of the Multiethnic Advocates for Cultural Competence (MACC), a statewide non-profit membership organization whose mission is to enhance the quality of care in Ohio's health care system and to incorporate culturally competent models of practice into the systems and organizations that provide services to Ohio's diverse populations.

Tavares' legislative priorities include: the elimination of health, education and criminal justice disparities; investment in Ohio's infrastructure; consumer protection; and addressing family stability.

She is a native of Columbus. She attended Eastmoor High School, Spellman College in Atlanta, GA, and The Ohio State University.

Sandra (Sandy) Oxley, Chief of the Maternal, Child and Family Health Bureau for the Ohio Department of Health and the MCH Title V Director for the State of Ohio.

Sandra (Sandy) Oxley has 15 years of public policy, government relations and management experience, with an emphasis on children's health and system approaches and serves on several Advisory Committees on the state and federal level. She has an in-depth knowledge base of maternal and child health programs including Medicaid and other child serving systems.

Barbara R. Sears, Director, Ohio Department of Medicaid

State Medicaid Director Barbara Sears oversees the Ohio Department of Medicaid, Ohio's first cabinet-level state Medicaid agency. Through its network of approximately 90,000 active providers, Ohio Medicaid makes coordinated, person-centered care available to residents in all regions of Ohio. The department has become a cornerstone of the Governor's Office of Health Transformation, which Governor John R. Kasich created in 2011. In conjunction with the Office of Health Transformation Director Greg Moody, the Ohio Medicaid team has implemented a series of innovative policy initiatives that have modernized the Medicaid program by improving the quality of health services at a substantial value to Ohio's taxpayers. Most recently, Director Sears served as Assistant Director for the Governor's Office of Health Transformation. In this role, she led high priority projects to advance the Kasich Administration's Medicaid modernization and cost containment initiatives. Prior to joining the Governor's Office of Health Transformation, Director Sears represented the 47th House District in the Ohio House of Representatives. While a legislator, she served as the Majority Floor Leader, Chair of the House Insurance Committee and Chair of the Joint Medicaid Oversight Committee. Most of her legislative and policy work focused on the state's health and human services, including Medicaid and unemployment reforms. Director Sears has been honored with over two dozen legislator of the year awards and lifetime achievement awards, including recognition by the Governor's Council of People with Disabilities. Director Sears began her political career in 1997 when she was elected to Sylvania City Council. She served on city council for ten years, the last four as President of Council and Chair of Finance. Additionally, she chaired the Toledo Metropolitan Area Council of Governments. Barbara was also an active health and life insurance agent and small business owner from 1985 to 2016.

Mark Redding, MD, FAAP, Co-Founder Pathways Community HUB

Mark's career focus has been community based care coordination focused on the comprehensive identification and reduction of risk within at risk populations. Mark has worked with Community Health Workers in Alaska, Baltimore and Ohio providing training, supervision and technical support.

Mark has worked with his wife Sarah to develop the Pathways Community HUB model and the related tools and resources to support CHWs and their supervisors in the identification and reduction of risk. These tools include models of agency networking, documentation, tracking, and pay for performance financing models. The HUB model works to leverage the powerful relationship impact of culturally connected CHWs, with the accountability and work product performance improvement models most current within American business.

A comprehensive approach to addressing risk spanning physical, behavioral and social/economic domains is central to the HUB model. CHWs with supporting health and social service professionals work as a team to assure the comprehensive identification and reduction of risk within populations at greatest risk. There is published evidence for improved outcomes and reduced cost.

Mark works within the Akron Children's Hospital Considine Research Center supporting and participating in research initiatives within childhood lifestyles and population health. This research as well as research related to all age groups impacted by the Community HUB are central areas of focus.

Mark works with the CHAPHUB in Richland County Ohio within quality assurance and related payment focus areas. He works directly with CHWs and their supervisors to maintain an on the ground connection and link to primary sources of CHW wisdom that inform the work.

Mark is also a primary care pediatrician with focus areas of behavioral health and autism.

Dan Paoletti, CEO, The Ohio Health Information Partnership

Dan Paoletti has been CEO of the Ohio Health Information Partnership since Sept. 2011. As a founding board member, he shaped the vision, mission and policies since its inception in 2009. With 25 plus years of experience in health care, his expertise has contributed to the nonprofit's accomplishments. The Partnership's Regional Extension Center was the largest and most successful in the nation, assisting 6,000 primary care physicians in the adoption of electronic health records and achievement of meaningful use. Because of his prior experience in HIT at the Ohio Hospital Association, Paoletti's collaborative spirit brings diverse and competitive entities together. He's garnered the collaboration of 150 hospitals and health systems to connect together through the CliniSync Health Information Exchange. More than 400 long-term and post-acute care facilities – including home health and hospice – have joined the exchange as well as thousands of physicians. Every day, he expands the capabilities of HIE to better serve the needs of the medical community and Ohioans. Paoletti earned his B.A. in biological sciences and health education from The Ohio State University.

Jason Buckner, Senior Vice President, Informatics, The Health Collaborative

Jason Buckner oversees the HealthBridge service line which is recognized as one of the nation's largest, most advanced, and most financially sustainable health information exchanges (HIE) in the country. Jason focuses on the vision for how healthcare data can be utilized to improve health and healthcare in the region.

Dr. Mary Applegate, Medical Director, Ohio Department of Medicaid

Dr. Mary Applegate serves as the Medical Director for the Ohio Department of Medicaid and is responsible for the implementation of the Medicaid Quality Strategy to improve health outcomes across the state. She is double-boarded in Pediatrics and Internal Medicine and has been in rural primary care practice for over 25 years, still caring for newborns and mothers in her region. Special interests include the systematic application of clinical principles and quality improvement science to health care delivery systems for improved quality in health care and improved health outcomes. She has been instrumental in driving change in perinatal health and mental health integration efforts.

As the agency lead for the initial CMS Transformation Grant, she helped forge partnerships to link vital statistics, claims and clinical information to improve preterm birth rates and other maternal outcomes in conjunction with Ohio's Perinatal Quality Collaborative. Current work is focused on the spread and sustainability of these efforts as part of the design of value based purchasing efforts. She served as co-chair of the CMS Expert Panel on Improving Maternal and Infant Outcomes in Medicaid, and continues to be focused on this population as the perinatal lead for the Medicaid Medical Directors Network.

Dr. Applegate is a fellow of both the American Academy of Pediatrics and the American College of Physicians.

Tanikka Price, Moms2B, OSU Wexner Center, Nationwide Children's Hospital

Tanikka Price grew up in North Linden yet earned a full scholarship to college. She graduated from Vassar College and headed for law school. She envisioned a life as a Civil Rights Attorney or Sports/Entertainment Attorney but life as a Single Mother of premature twins invoked a passion and forced a career change. Price has worked tirelessly since 2011 as a Community Health Educator at Moms2B, a pregnancy and education support program that aims to reduce infant mortality, in areas where infant mortality is at its highest. In addition, Price is a published author, practicing domestic Attorney, Life Coach, Motivational Speaker and Blogger. She brings passion and enthusiasm to all she does and loves to teach others through narratives. She is currently in her second year of a graduate program to earn her Doctorate in Education.

Reina Sims, Program Manager, Ohio Commission on Minority Health

As Program Manager, Ms. Sims is responsible for the grants administration and program oversight of the Commission's funded programs, in addition to supervision of agency program and fiscal staff. Ms. Sims is also charged with participation on state and national collaboratives around minority health initiatives.

Prior to service as Program Manager for the Ohio Commission on Minority Health, Ms. Sims worked in both public and private sectors. In the public sector, she served as an Educational Consultant III with the Ohio Department of Education, a Human Services Program Consultant for the Ohio Department of Health, and as a Senior Program Manager and Registered Lobbyist for the Ohio Tobacco Prevention Foundation. In addition to program and grants administration in previous positions, Ms. Sims also served as a national speaker on tobacco and minority health related issues, and as a staff liaison for marketing strategies, which focused on reaching underserved populations.

Ms. Sims' private sector history includes prior service as the Director of Program Services and Minority Research for the Central Ohio Breathing Association and service as the Director of Detection and Outreach for the Central Ohio Diabetes Association.

Ms. Sims is a graduate of Central Michigan University where she earned a Master of Science degree in Health Service Administration. She earned her Bachelor of Science Degree in Education, from The Ohio State University.

In addition to professional endeavors, Ms. Sims is a member and past Executive Board Member of Delta Sigma Theta Sorority Incorporated - Columbus (OH) Alumnae Chapter, a member of the Columbus Chapter of The Links Incorporated, and a Sustainer, and former Board Member of the Junior League of Columbus, Inc. She is currently married to her husband of 21 years, James Sims II, and is the mom of one 10-year-old son, James Sims III, and mom to her family's loveable Boxer, Baxter.

Diane Cummins, COO, Five Rivers Health Centers

Dianne Cummins is the COO of Five Rivers Health Centers (FRHC) a Federally Qualified Health Center with 6 locations in Montgomery County that provides family medical, prenatal, well-women care, pediatric, dental, pharmacy, and specialty care to all patients regardless of their insurance. It provides comprehensive health services to the medically underserved while helping patients to establish medical homes. Ms Cummins is responsible for planning, developing, coordinating, directing, supervising, and organizing all operational functions for Five Rivers Health Centers. She measures the effectiveness of processes and procedures and work with the respective team to develop and implement changes when necessary. Montgomery County has one of the highest low birth weights, premature birth rates, and infant death rates within the nation. Some of the highest rates are found in zip codes 45402, 45403, 45405, 45414, 45416, 45417, and 45426. FRHC Healthy Start is a free program to help pregnant moms and dads, women, and babies to have healthy lives. Community Health Workers, Nurses, Dietitians, Social Workers, Certified Nurse Midwives, Certified Nurse Practitioners, and Doctors are available to improve birth outcomes.

www.csohimss.org

The HIMSS Chapter of Central and Southern Ohio (CSOHIMSS) exists to support careers in healthcare information systems in Ohio. CSOHIMSS has representation from the hospital, provider, school, consultant and vendor healthcare industry segments, and works to enhance communication and education among its members.

As an affiliated chapter of the Health Information Management Systems Society, CSOHIMSS shares the basic objective with the society of promoting the professional development of members, working to improve the reputation of the profession, and encouraging advancement in the field of health care management systems.

The purpose of the affiliated chapters of the society is to provide an organized structure at the local and state level to advance the objectives of both the society and the affiliated chapters. Whether your area of interest is advancements in new information systems, innovative telecommunications technology, best practices of information technology to support clinical initiatives, methods for collaboration between disciplines, quality improvement or management systems, CSOHIMSS offers professionals comprehensive services such as information, educational programs and networking opportunities.

www.nohimss.org

The Northern Ohio Chapter of HIMSS mission is to enhance professional knowledge, create forums for networking and foster leadership at the individual and corporate level.

Our vision is to build and sustain a vibrant organization that is the recognized leader and authority on healthcare management of systems, information and change representing multi-disciplined professionals of all levels throughout Northern Ohio.

Membership in NOHIMSS is open to all persons interested in management systems, information systems and telecommunications as they apply in healthcare. The current membership consists of IT professionals, consultants, vendors, physicians, nurses, professors and students actively working in or interested in these areas of practice:

- management
- information systems
- telecommunications
- clinical systems

<http://www.ohima.org/>

The Ohio Health Information Management Association (OHIMA) is Ohio's professional healthcare organization of over 4000 credentialed specialists in the field of health information management (HIM). HIM Professionals are a select group of trained professionals who specialize in managing patient health information and medical records, administering computer information systems, and coding the diagnosis and procedures for healthcare services provided to patients. They are committed to the timely and accurate collection of health information and its maintenance, storage, retention, and disclosure, HIM professionals ensure such information is kept private, secure, and in accordance with federal and state laws.

OHIMA is a nonprofit, component state association affiliated with the American Health Information Management (AHIMA) numbering 72,000 members nationwide. OHIMA is committed to advancing the health information management profession through leadership in education, advocacy, membership engagement and lifelong learning.

The College of Healthcare Information Management Executives (CHIME) is an executive organization dedicated to serving chief information officers and other senior healthcare IT leaders. With more than 1,400 CIO members and 70 healthcare IT vendors and professional services firms, CHIME provides a highly interactive, trusted environment enabling senior professionals and industry leaders to collaborate; exchange best practices; address professional development needs; and advocate the effective use of information management to improve health and healthcare in the communities they serve.

CHIME offers membership to CIOs and senior IT leaders at healthcare related organizations. To facilitate collaboration and the development of stronger healthcare IT leaders, CHIME members are encouraged to invite qualified members of their IT team to join CHIME or become a CHIME Affiliate. To find out more about CHIME, go to <http://www.cio-chime.org>.

Ohio Health Information Partnership

www.clinisync.org

CliniSync is Ohio's statewide Health Information Exchange (HIE). While some physicians, hospitals and healthcare professionals can exchange patient information regionally or within a health system, this exchange is statewide, allowing medical professionals in different regions to electronically share lab results, patient histories, problem lists, encounters and other information about a patient's care. The Ohio Health Information Partnership is an independent, nonprofit that manages CliniSync. Currently, 150 hospitals are contracted and 129 are live, and thousands of physicians and other providers have joined CliniSync. Our vision is to improve electronic communication among those who touch a patient's care so we can improve health care for all Ohioans.

CA Technologies

<https://www.ca.com/>

For more than 30 years, we've fueled digital transformation through the power of software. Today we're as committed as ever: partnering to help companies of all kinds seize opportunities and create real, meaningful change. We believe that a single idea can change the world. But great ideas only matter when they become real, ready-to-launch products and services. That's why our mission is to help our customers eliminate the barriers between ideas and business outcomes. We support public-sector clients in serving the public good. Beyond providing technology, we participate in dialog surrounding privacy, security and other key issues impacting government and business.

www.healthbridge.org

HealthBridge is a not for profit corporation that supports health information technology adoption, health information exchange, and the innovative use of information for improved health care outcomes. For well over a decade, we've been recognized as one of the nation's largest, most advanced and most financially sustainable health information exchanges.

With our uniquely connected technology and innovative process improvement, we don't just exchange information; we make the information meaningful for hospitals, physician practices and other health care organizations. By ensuring that the right information reaches the right people at the right time, HealthBridge enables stakeholders to make better decisions that enhance patient care and lower health care costs.

<http://www.covermymeds.com>

The Leader in Electronic Prior Authorization. CoverMyMeds was founded in 2008 with a mission to automate the medication prior authorization (PA) process, saving health care professionals valuable time and ensuring patients receive the medication they require, faster.

www.ehealthohio.org

eHealth Ohio (formerly OHIO for EDI) is a corporation for charitable and educational purposes, as defined in Section 501(c)(6) of the Internal Revenue Code, for the specific purposes:

- To be the regional affiliate of the Workgroup for Electronic Data Interchange, Strategic National Implementation Process (WEDI/SNIP) for the State of Ohio.
- To act as a collaborative effort of various healthcare industry organizations to develop and implement initiatives related to health information technology.
- To focus efforts in the State of Ohio to achieve industry-wide representation, work jointly to provide solutions, policies, and educational outreach, and, consistent with and as otherwise permitted by Section 501(c)(6) of the Code, promote various aspects of incremental healthcare reform including, but not limited to, improvements in the privacy and security of health information, standardization of electronic healthcare records and transactions, and health information exchange.
- To facilitate ongoing dialog and cooperation between covered entities and appropriate business associates in healthcare information technology that may result in lowering costs and improving the quality of healthcare delivery.

<http://www.cisco.com>

Cisco Systems, Inc. is the largest networking company in the world headquartered in San José, California. It develops, manufactures, and sells networking hardware, telecommunications equipment, and other high-technology services and products. Through its numerous acquired subsidiaries, such as OpenDNS, WebEx, and Jasper, Cisco specializes into specific tech markets, such as Internet of Things (IoT), domain security, and energy management. Cisco is listed on the NASDAQ stock exchange.

www.redhat.com/government

Governments across the U.S. demand performance, transparency, and value - exactly what Red Hat and open source software offers. Red Hat is the standard choice for enterprise grade Linux in governments worldwide.

But Red Hat is delivering so much more! Our hybrid cloud, virtualization, storage and service-oriented solutions bring real freedom and agility to federal, state, local, and academic programs. In health IT, Red Hat software underpins most popular solutions in use in hospitals and CMS related systems. Finally, Red Hat's worldwide support, training and consulting services bring the power of open source to your agency but implementing valued solutions.

We are a part of a larger community working together to drive innovation. Learn more at www.redhat.com/government.

www.ntst.com

Netsmart is the largest technology provider connecting behavioral health and post-acute care with all of healthcare. Netsmart is passionate about integrating care across all aspects of a community. We know that healthcare doesn't always happen in a traditional clinical setting, so we're committed to working alongside our clients to innovate the most effective and intuitive technology possible. Our clients are strong advocates for those that don't always have a voice, which is why Netsmart is dedicated to leading change within the industry by breaking down barriers to provide a holistic view of each individual.

Our more than 500,000 users in more than 24,000 organizations work together with Netsmart's 1,250 associates to connect communities and information across the care spectrum. Our technology ensures comprehensive data flows between [behavioral health](#); [addiction treatment](#); [intellectual and developmental disabilities](#); [child and family services](#); [public health](#); [long-term/post-acute care](#); [home health](#); [hospice](#); [palliative care](#); [private duty](#) and [vital records](#).

We understand the importance of clinical adoption; training and support; regulatory compliance; and the need to connect to the rest of healthcare. We design our solutions so our clients can focus on what they do best - providing quality care. For more information, visit www.ntst.com

<http://OnBase.com/Healthcare>

OnBase by Hyland is an enterprise content management solution that combines the technologies of report management, document imaging and workflow. OnBase healthcare solutions enable organizations to run more efficiently by managing content and streamlining workflows across the enterprise with point solutions for medical records, revenue cycle management and administrative departments.
